resume  			 orange
de-activate  			 green
switch off  			 off
Memory's*  		program: hold for 2 sec. usage: press briefly ! For the limiter and Cruise Control different speeds can be programmed	

*only CM35

Cruise Control

- The Cruise Control can be used from 35 kph
- Don't use the Cruise Control during bad weather
- The Cruise Control does not slow down! But only release the throttle
- It's always possible to accelerate in the interim by pressing the throttle. After that the car will resume the set speed if the speed has not been increased by more than 50% compared to the set speed

The Cruise Control will switch off with:

- Braking
- Pressing the clutch (if connected)
- De-activate
- Switch off Cruise Control
- Decrease speed by 25% compared to the set speed
- Increase speed by 50% compared to the set speed
- Switch off the ignition

Limiter

- The limiter can be used from 35 kph

The speed limiter will switch off with:

- De-activate
- Switch off the speed limiter
- Throttle kick down
- Switch off the ignition
